PEARC19

Practice and Experience in Advanced Research Computing

RISE OF THE MACHINES (LEARNING)

July 28 - August 1, 2019
Chicago, IL

PEARC 19 Prospectus
Exhibitor Prospectus

PEARC19 PEARC19 provides a global forum for students and professionals to discuss challenges, opportunities, and solutions in the fields of advanced research and data-intensive computing. A primary focus this year will be on machine learning and artificial intelligence which are dynamically impacting a diverse range of fields from materials science to medicine while shaping the skills of an emergent workforce.

We invite you to join us for this opportunity to participate in these conversations and showcase your solutions with prospective customers, colleagues, and students.

Offering tutorials, plenary talks, panels and in-depth technical content, PEARC19 both informs experts in the field and introduces the tools, technologies and methods of computational science to new users and those who support them. The conference features a dynamic student program and diversity efforts, bringing together researchers, students, and prospective users.

Your organization will have an opportunity to advance exciting new collaborations and reach bright young minds, while engaging with an international audience.
